**Public Opinion Asserted Principal
Factor in Outcome as Law
Faces Supreme Test**

WASHINGTON, Sept. 13.—A belief that prohibition in the United States is facing a supreme test, with the final outcome doubtful, was expressed tonight in a report compiled after months of investigation by the research and education department of the Federal Council of Churches.

"We can say with positiveness what the ultimate outcome of this test will be," said the report. "No cocksure optimism is warranted, nor is pessimism or 'defeatism' justified by the facts. Much seems to depend upon the development of conditions in the near future."

**Former Newspaper Men
Find Much-Sought Radio
Aid in Subantennae**

(EXCLUSIVE DISPATCH)
CHICAGO, Sept. 12.—After years of experimenting by experimenters and amateur radio fans all over the country with underground wireless stations, the Federal Bureau of Investigation today announced that it was taking steps to suppress the use of the device without any marked success. James D. Gibson and Ray, his son, former newspaper men, have discovered that the device, which is so simple and the results so satisfactory that it is a wonder it was not discovered long ago, is being used by a number of persons in the Chicago area.

Child, 12 Years of Age, Accepts Membership in Exclusive Society of Authors

[EXCLUSIVE DISPATCH]

NEW YORK, Sept. 13.—Modestly, without more than a hint of pride in her accomplishment, Nathalia Crane, 13-year-old poetess of Brooklyn, admitted today that she had despatched a letter to London accepting an invitation to membership in the British Society of Authors, Playwrights and Composers.

At the next meeting of the membership committee, according to J. Harbert Thring, solicitor for the society of which Thomas Hardy is president, the small Brooklyn citizen will be accorded full rights in the organization—an almost unique honor for an American.

The invitation was received last week following the publication of Nathalia's book of verse, "The Janitor's Boy," in England. In his country the book already has run into seven editions. A second volume entitled "The Janitor's Daughter" is being published in New York this week.

Government to Start Work on San Diego Base

[EXCLUSIVE DISPATCH]

SAN DIEGO, Sept. 13.—Belief that construction work on the proposed light-house-air base here will be started soon even than Secretary of the Navy Wilbur expected, was expressed today by those who are in close touch with the Navy's dirigible operations.

Employment Conditions Except in Few Industries Show Improvement

WASHINGTON, June 12.—Favorable industrial conditions were reported today by the United States employment service of the Department of Labor in its monthly summary of the situation in various sections of the country.

"An analysis of reports received by the United States employment service for the month of August states that there is no serious amount of unemployment in the country," said Francis I. Jones, director-general of the employment service. "Except in a few industries, where small reductions in forces were reported, demand for labor slightly increased during the month under review."

SAN DIEGO, Sept. 13.—Belief that construction work on the proposed lighter-than-air base here will be started sooner even than

According to authentic information received here, Secretary Wilbur has ordered all budget items pertaining to the Navy's dirigible program eliminated from the appropriations next year. It is believed the Dept. of Defense will place the New Jersey base on a skeleton basis until the dirigible program is completely terminated. The fleet of rigid airships which the fleetship which will replace the ill-fated Shenandoah, can be sent to San Diego and properly housed. It is believed that it will be 1928 before appropriations will be made on a large scale for the construction of a new air base, but that limited construction will be made available meanwhile. Secretary Wilbur's plan to be the world's largest and most thoroughly equipped airship base.

Naval Air Chief Flays Aviation Critic as Sufferer from Grandeur Delusions

(EXCLUSIVE DESPATCH)

WASHINGTON, Sept. 13.—Rear-Admiral William A. Moffett, chief of the Bureau of Aeronautics of the Navy Department, hit back at Col. William Mitchell today in hammer-and-tongs fashion. In a lengthy statement replying, item by item, to the sensational charges of Col. Mitchell involving "almost treasonable administration of the national defense by the Navy and War departments," Admiral Moffett used torrid language in branding the various assertions as false.

**League Regards Attempt to
Further Protocol Aim at
This Time as Perilous**

(SEE CARLIS AND ASSOCIATED PRESS)
GENEVA, Sept. 13. — If the Geneva peace protocol of 1924 numbers, its guiding principles of "no more wars" and "no disarmament except on a living force" inspiring patient efforts to attain permanent world peace. This, at least, is an authoritative summary of impressions in Geneva today following upon the first week of the 1925 meeting of the League of Nations Assembly.

It is the basis of the position of Great Britain to the protocol of 1924, newly reiterated by Austen Chamberlain, Britain's Foreign Secretary, before the Assembly. This body now seems to realize that nothing can be done in this direction until the protocol of 1924 is as it is now framed. It is also realized that any attempt to amend the protocol of 1924 will be both unwise and perilous.

Now that negotiations for a settlement are to begin anew between Germany and the Allies, including Italy, the delegate to the League of Nations Assembly says that any concrete action must await the outcome of these deliberations. He says that if these negotiations succeed, one of the aims of the Geneva protocol, that is, security, has been attained.

But the situation is heavy with grisavor. Four days ago, the crew of the Shenandoah and when hopes of the rescue of the crew were fading, the United States was seized upon by the proponents of a separate air force as a fitting occasion to make a claim. The claims by an attack upon agencies of the government charged with the duty of aviation, said Admiral Moffett.

"Before the Shenandoah dead had been recovered, the broadcast in the public press, which were its falsehoods and vindictiveness, are almost as great as the tragedy of the country. These charges, couched often in the forms of questions to protect the public, are not only palpably false as to make one wonder how they could have been made, but they are also at a moment of great stress and intense emotion, they have done incalculable harm. The result is only now that their absurdities are beginning to be understood."

But the charges are made in the guise of bringing about a reform in our system of national defense and of advancing the cause of aviation. They have done more to retard aviation and hamper national defense than they could have accomplished by any other means."

DISTURBING FACTOR
The most disturbing factor in the situation is the example of military aviation set by the government making a political

AMERICAN FILM BOYCOTT ASKED
British Press is Proposing Extreme Measure
Limitations on Pictures and Tax Planned
Comment Held More for New Debt Basis
[BY CABLE-REUTERS DISPATCH]
LONDON, Sept. 13.—A boycott of American-made motion pictures will be effected if no agreed laws are passed.
The British press is making every effort to ensure that American films, and it now appears that the heavy trade balance and the British debt settlement, are the main reasons for the proposed boycott. It is estimated that the boycott would cost the American film industry about \$10,000,000 per year.
The boycott is being proposed by the British film industry, which is suffering from a severe slump. The industry is asking the British government to pass laws which would limit the number of American films shown in British theaters and to impose a tax on American films.
The British press is supporting the boycott, and is calling for a general strike against American films. The boycott is being proposed as a means of forcing the American government to pay the British debt.

TERROR REIGN SUSPECT HELD

Nashville's Masked Attacker Believed Captured

Giant Negro, Found Trying to Enter Home, Shot

Prowler Battles Policemen Who Make Arrest

[REUTERS DISPATCH]
NASHVILLE, Tenn., Sept. 13.—The masked mystery man of Nashville, who has more than a score of atrocious crimes against women of this city to his credit during the last few weeks, is believed to be in the hands of the police today.
The man in custody as a suspect is Harry Horne, a giant negro, who was shot and captured by Nashville detectives Saturday.
Since his arrest many persons have identified the negro as the masked prowler who entered the homes during the night, assaulted several women and soiled several others into hysterics. Under prolonged questioning the man is weakening, and the police believe he will confess within a short time.
There was a sigh of relief throughout the city today following the police announcement that they believe Horne is the guilty man.

ARMED WITH KNIFE

Armed with an ugly looking knife, the masked prowler has been operating throughout the city for three weeks, defying a cordon of police and detectives. He would invade a home, assault or attempt to assault one of the women inmates and disappear into the darkness. By changing his tactics from the early morning hours until as early as 10 p.m., he kept the entire police force and scores of vigilantes continually on the alert. During the day he would write notes to the Chief of Police, telling him that he would enter a home that night. The prowler's method was to enter a home by a window, kill himself upon his victim and disappear in the way of valuable anything in the way of valuables. Several times the police saw him leaving a house, and rained bullets after him, but he seemed to bear a charmed life. The ineffectiveness of the bullets led the police to believe the man wore a bullet-proof vest. So serious did conditions become in the affected district that the University of Tennessee ordered a company of the National Guard to help in running the man out of the city.

SEEN BY OFFICER

Policeman, Kirk Denton, while patrolling his beat on Johnson avenue early Saturday morning saw a giant form creeping from window to window, apparently in search of one he could open. Having the bullet-proof vest in mind, Denton fired low and hit the negro in the thigh. When Denton closed in on Horne, the negro attacked him and attempted to wrench the officer's revolver from him, but was overpowered.

SAN JOSE CITIZEN HAS ANCIENT ROMAN COIN

[REUTERS DISPATCH]
SAN JOSE, Sept. 13.—Pio Taminelli, of 26 North Second street, who is interested in metallic tokens of ancient Rome, has a collection of about thirty-five Roman coins. He has exhibited a copper coin of the Roman republic, which is said to be more than 2000 years old. It is about the size of a quarter and bears the head of Jupiter and the letter "S." This piece of money was issued between 134 and 114 B. C. according to Prof. O. M. Washburn of the University of California, who made an examination of the coin.

AN IDEAL CLEANER AT A SAVING

Do you need a new vacuum cleaner? Let us demonstrate for you, the new model WESTERN ELECTRIC, as sturdy a cleaner as you have ever seen and which we can sell you for \$38.00—a price you will recognize as substantially lower.
We are able to make this price by eliminating house-to-house canvassing and its accompanying cost. You must come to the store to make this saving—but it's worth the trip.

FRENCH FORCES CRUSHING RIOTS

Thirteen Posts Retaken in Petain's Advance

Loyal Patriot Restored to Power in Drive

Rebels Hurlled Against Oncoming Columns

[BY CABLE-REUTERS DISPATCH]
FEZ, Sept. 13.—More and more posts which a few months ago enjoyed a death of publicity, as scenes of hard fighting and dropped out of the news with the laconic epithet, "suppressed or captured," reappear in the Communist as Marshal Petain's gigantic steam roller moves resolutely on.
During the last day thirteen of these posts have been retaken from the rebels and more were added today.
One of the great political objectives of the offensive was achieved yesterday when Zeouli and Anjou were captured and the venerable patriarch, Beni Zeroual, of the tribe Beni Zeroual, a local power, almost alone of the tribesmen, he remained loyal to France and it is in lonely grandeur he has now recaptured his old seat; but the country over which the French have been advancing is almost entirely deserted. Even women and children have been withdrawn behind the lines of Abd-El-Krim's army.

RIOTS' COUNTER-ATTACK

Three important developments stand out in the details arising from the offensive against the central sector. The rebels are violently counter-attacking in the west against the column which relieved Isoula and now occupy the old post of Beni Zeroual. Brigades marching from Skiffa Terroual converged last night at Isoula, and the north of Anjou, and only five miles south of the frontier of the French protectorate. The French, however, are not continuing their attack today and are consolidating the positions gained and repairing roads which the rebels had systematically destroyed.

READY FOR CAMP

Occupation of Isoula makes the tip of the narrow salient here ten miles north of Ouargha. It is like a spear head aimed at dividing the line between Igballa tribes and the Rif. Close as they now are to the Spanish frontier, which swings south, the French are in good position to carry out this plan if the Spaniards give them permission to cross the line. However, Hendrick Houli, directly to their rear, is still in the hands of the rebels. The big handicap to such an attack or any advance into rebel territory is lines of communications.

MAY CHANGE TACTICS

Thus far in the French military road, at least ten miles of winding highways have been reconstructed to assure the present occupation of Isoula with the prospect that within a month rails will be laid and all other roads of the central sector impassable.

BRYAN TOGA IS SOUGHT BY DR. STRATON

Fundamentalist Suggests He Carry on Fight Against Evolution Teaching
[REUTERS DISPATCH]
NEW YORK, Sept. 13.—Rev. John Roach Straton, in a sermon at Calvary Baptist Church tonight, made an indirect bid for the fundamentalist mantle of William Jennings Bryan.
"The suggestion comes from many quarters," he said, "that I carry forward the campaign in opposition to evolution that our fallen chief, William Jennings Bryan, had to lay down. These suggestions have been made, I suppose, because Mr. Bryan and I were so closely associated and were so at one in the conviction that evolution was a threat to the right against evolution but declared he will devote all his extra time to it."
He expressed a keen desire to debate evolution with Clarence Darrow. A trip through the South and West, he said, had revealed to him that the Scopes trial had awakened strong orthodox religious feeling in those sections.

The Flaring Silhouette
Swings Across the Fall Horizon
Animation—activity—a fluttering, flaring line—this is the picture of the Autumn mode. The back flare, most recent arrival, the flare at both sides, the flare that encircles the frock or coat and the subtle flare of pleats in the more tailored frocks.
The Flare Is Emphasized in Dresses
Hundreds of frocks and dozens of variations of the flare, for daytime and evening wear. Evening gowns of crepe Roma, velvet and flat crepe introduce it in gowns, while chiffon dancing frocks flutter with many circular godets. Daytime frocks of crepe, satin, velveteen and mirlolene reveal the subtle flare in kick pleats. Every frock shows motion and color.
\$55.00 to \$98.50
An Uneven Hemline Appears in Coats
Coats for Fall are richer and more luxurious than ever before, in fabric, in grace of line, in detail. Soft, lustrous fabrics flare smartly all round or at one side. The chief charm of the silhouette is below the waistline and the colorings harmonize with the fine felts of squirrel, fox, lynx and krimmer.
\$98.50 to \$198.50 and more

first thing in the morning
A day filled with a "thousand and one" things to be done affords little or no time for physical exercise—a contributory cause of constipation.

RHEUMATISM RELIEVED

Mr. Eastman Could Not Walk to Bathtub Without Assistance, But COSO MINERAL MUD BATHS and VOLCANIC IRON WATER Restored Health

After years of suffering with rheumatism, my condition became recently almost helpless. Through the advice of the manager of a large lumber company, I began the use of Coso Volcanic Iron Water and Volcanic Mineral Mud Baths. Drinking the water seemed to thoroughly arouse my liver and rapidly improved my digestion. When I first began taking the mud baths my wife had to assist me to the tub, as it was practically impossible for me to take the baths without assistance. After drinking the water only a few days and after two or three of these baths the inflammation was rapidly removed and my condition improved to such an extent that I could take the baths without help, and now after completing the course I am in better physical condition than in many years. I have perspired as I had never perspired in my life since pouring this volcanic mud into my bath water. My skin was dry and felt unnatural, but the clay seemed to open the old closed pores, arouse my circulation, and seemed to draw like a plaster. I actually feel today that Coso Water and mineral mud baths have made me a new man and life worth living. I have absolutely no interest in the Coso treatment, further than to assist my friends and anyone who may suffer from rheumatism or a similar ailment. Those interested may correspond with me or speak with me in person.

**PASADENA IS
POPULAR CITY**

Mecca for Many Important
Conventions
Thousands Gather to Attend
Meetings

**Chamber of Commerce Se-
cures Many Gatherings**

By a "Times" Staff Correspondent
PASADENA, Sept. 13.—Pasadena is steadily becoming more widely recognized as an ideal convention city, and will be the scene of the annual gathering of a large number of organizations during the next few months, according to H. M. Nickerson, chairman of the Chamber of Commerce convention committee. Meetings announced today for important conventions that will be held here in the near future.

The first meeting will be that of the tenth district of the California Real Estate Association, whose delegates will convene in Pasadena, starting the 14th inst., to formulate plans for the state convention early in October. The National Woman's Home Missionary Society will also hold its annual convention in this city, October 1 to 12. Hundreds of delegates from all parts of the country will attend this outstanding event of the church year.

SERVED WITH RODGERS

Albany Men Recall Long Years
In the Navy

ALBANY, Sept. 13.—G. Waldeck, who is now an attendant at a gasoline station here, served for two years as torpedo man on the R-4, the submarine which sank the Japanese battleship, the island of Kauai Thursday night. Waldeck still has a number of friends on the submarine, he said today.

CHEAP VACATION

Van Nuys Men Keep Record of
Expenditures

GIANT FOREST (Sequoia National Park) Sept. 13.—It costs less to go fishing in the national park than to stay at home, according to George Hume of Van Nuys, who recently made two trips to the high Sierras out of Giant Forest. Accompanied by Rev. W. W. Catherwood of Riverside and Master Catherwood, Hume and his party of four, including his wife and two children, fished for trout and bass in the park's streams and lakes. Hume's detailed report, filed with John R. White, is most interesting and is open to other visitors.

**TIMBER WOLVES AID
TO DEER HUNTERS**

THREE RIVERS, Sept. 13.—Timber wolves are declared plentiful in the southern and more distant portions of Sequoia National Park, and are reported to be driving deer from protecting confines of the national preserve into the valleys within range of the hunters' guns.

ANNEXATION ELECTION

SOUTH GATE, Sept. 13.—Tomorrow is election day in the territory just at the southeast of this city, when a special annexation election will be held to decide whether the territory will become a part of this city. There are seventy-six registered voters in the territory, which comprises 145 acres of land. If this territory is annexed it will bring the acreage of this city up to 1700. The voting place has been selected as 5014 Lincoln Boulevard and the members of the election board are Joseph Capps, inspector; Anna M. Foss and Marie Grader, judges.

**ROAD PLANS
EXPLAINED
BY RANDALL**

Councilman Says Action
Soon to be Obtained on
San Fernando Widening

LOCAL CORRESPONDENCE
ROSCOE, Sept. 13.—In a statement made here today, Councilman Charles H. Randall in telling of the status of plans for the improving of San Fernando Road, said that work is to begin at once by force account on the ten feet of existing right of way between the present paving and the railway right of way and on the resurfacing job of the entire street to a width of thirty-two feet. At the same time a rush-order proceeding is to be started by the Council to pave all of the additional right of way to a maximum width of sixty feet from the south boundary of the city of San Fernando to the north boundary of the city of Burbank.

**PACKS TONS
OF PEACHES
THIS SEASON**

Cannery at San Fernando
Expects Total Business to
Break All Records

LOCAL CORRESPONDENCE
SAN FERNANDO, Sept. 13.—The Fernando Cannery Company, so far this season has packed 1000 tons of peaches and will swell the amount to about 1150 tons before the pack is completed, it is announced. The run this year will be the best in the history of the local plant. The cannery is now engaged in packing tomatoes alternately with the tag end of the peach pack, and will continue far into December. It is stated that the weekly pay roll of the cannery has been averaging about \$120,000 each week. Last year the plant put up more than 3000 tons of tomatoes, and the management today states that it hopes this season to excel these figures.

**Alhambra Sets
Goal at \$20,000
in Charity Drive**

LOCAL CORRESPONDENCE
ALHAMBRA, Sept. 13.—A quota of \$10,000 was set for the Alhambra by the San Gabriel Community Chest campaign, at a meeting of officers and representatives of the various welfare agencies to participate in the 1925-26 budget. Last year the quota was \$10,000, of which only about \$7,000 was raised. This year the managers of the drive, Miss Edith Cowie and Mrs. Madeleine Foster, are confident the quota will be oversubscribed.

**West Valley
Paving Still
Hanging Fire**

LOCAL CORRESPONDENCE
CHATSWORTH, Sept. 13.—Recent extra burdens of work in the city Council have delayed the preparation of the report of the Council's street opening and widening and finance committees, under which the repaving of Canoga avenue, Devonshire street and Chatsworth Drive will be carried out in the western part of San Fernando Valley. It is expected, however, that all property owners to be benefited by the repaving and widening will contribute a remaining sum sufficient to cover the total expenditure. The three streets linked up are more than ten miles long and completed will furnish a fast traffic highway from Ventura Boulevard through the western and northern parts of the valley into the city of San Fernando, an urgently needed route.

Schools Call Youth of California in Many Cities
of the Southland

LOCAL CORRESPONDENCE
SANTA MONICA, Sept. 13.—An increase in the attendance at all Santa Monica schools on the opening day, Monday, September 14 is considered in prospect despite a recent ruling of the Board of Education which excludes pupils from other districts from attending classes in schools of the Santa Monica district. Approximately 300 children are expected by the board's ruling.

TEACHERS GET ACQUAINTED

HANFORD, Sept. 13.—All the teachers in the elementary schools of Kings county gathered at the Municipal Auditorium of this city yesterday noon, to become acquainted and hear short addresses relative to the opening of all the grammar and high schools of the county Monday.

JUNIOR COLLEGE POPULAR

PASADENA, Sept. 13.—With new buildings rapidly nearing completion, equipment greatly increased, and with every prospect of a banner year, Pasadena's educational officials are preparing to open the doors of the twenty-five public schools tomorrow to the largest enrollment of students in the city's history.

RIVERSIDE, Sept. 13.—In order to prepare Riverside for the 40,000 population expected within a few years, no less than a forty-two-inch water main should be laid and a 12,000-gallon reservoir should be constructed. This is the recommendation of Edward R. Bowen, engineer of the Los Angeles Municipal Water Company, in a letter regarding improvements to Riverside's water system, contemplated in the bond issue to be voted November 17, report was made at a meeting of the utilities board in the office of Mayor Evans.

Ordinance of
Important Road to
San Fernando

LOCAL CORRESPONDENCE
PASADENA, Sept. 13.—An ordinance of the City of Pasadena for the extension of the Sherman Road from the intersection of the road with the San Fernando Road to the intersection of the road with the San Gabriel River, was passed by the City Council today. The ordinance provides for the widening of the road to a width of thirty-two feet, and for the construction of a new bridge over the San Gabriel River. The estimated cost of the project is \$400,000.

Klan Charge to Defeat Smith, View of Hylan
[EXCLUSIVE DISPATCH]
NEW YORK, Sept. 13.—Gov. Al Smith's action in hurrying at Mayor Hylan an accusation of undue intimacy with the Ku Klux Klan in the Democratic National convention in Madison Square Garden last year is being relied upon by the Hearst-Hylan forces to defeat the Tammany candidate for Mayor in the Democratic primary Tuesday and put a crimp in the Governor's aspirations to supreme political power in New York immediately, and to the Presidency, eventually.

CITES CASES IN MESSAGE TO MEXICO
Sheffield Returning With Memo of Asserted Neglect by Republic, Says Report
[BY CABLE.—EXCLUSIVE DISPATCH]
MEXICO CITY, Sept. 13.—Prominent Americans here are authority for the report that Ambassador Sheffield will return early in October, bringing a note from Secretary Kellogg, specifying twenty distinct cases where American property and interests in Mexico have failed to obtain protection. These cases are said to be carefully selected, in order to back the points made in the first Kellogg note. It also is stated that Mr. Sheffield will remain only a short time in Mexico City or until the Mexican government has answered the note about these cases. Mr. Sheffield, according to Americans who claim close acquaintance with the Ambassador, expects to return to New York time for the Christmas holidays. Considerable speculation is caused by the report that Mr. Sheffield will not remain at his post. On the one hand, it is said, Mr. Sheffield expects considerable trouble in getting the Mexican government to see the American cases from the State Department viewpoint, which might mean diplomatic friction. On the other hand, it is said, he expects to straighten out all matters and leave them in such shape that it will be possible for him to return to the United States. It is also known that the attitude does not agree with the Ambassador's health. Recognition of Mexico by Great Britain has removed a load from Mr. Sheffield's shoulders as now he can devote all his time to American interests without being called to handle interests which, in many cases, especially commercial, are antagonistic to American business.

Harding's Kin to See Unveiling of Kiwanis Tablet
[EXCLUSIVE DISPATCH]
VANCOUVER (B. C.) Sept. 13.—Dr. Harding, brother of the late President Warren G. Harding, will attend the unveiling of the Harding memorial in Stanley Park here the 16th inst. It has been learned in this city that President B. W. Willis of Ohio will represent the United States government. Dr. J. H. King, Minister of Public Works, will represent the government of Canada. The memorial is designed to perpetuate the memory of Warren G. Harding.

Curiosity ---their greatest teacher
CHILDREN who have the Book of Knowledge in their homes gain a long start in the race for knowledge. Their teacher will tell you that when she wants a clear and intelligent answer, she can be sure of it from them. The Book of Knowledge answers every question a child can ask.

The BOOK OF KNOWLEDGE
10,000 Pictures
There are sixteen great departments in The Book of Knowledge—nature, science, history, biography, art, poetry, literature, etc. They contain the important, interesting and authentic knowledge of the world. The Book of Knowledge draws out the mental powers. It quickens and stimulates interest. There are 10,000 illustrations in The Book of Knowledge, many in natural colors. They are a brilliant picture gallery of what the world is doing. The lessons they teach can never be forgotten. They make learning the delight that it ought to be.

Worth Inquiring About
What would The Book of Knowledge do for your boy or girl? Would you like to see for yourself? We will gladly mail to you free and without obligation a booklet of articles and pictures taken from The Book of Knowledge itself. Merely mail the coupon today.

FARM INCOMES SHOW INCREASE

Rate of Return on Invested
Capital Also Grows

Figures for Current Year
Indicate Gain

Profits Still Far Below War
Period Level

WASHINGTON, Sept. 13.—An increase of \$729,000,000 in net cash income of American farmers in the crop year 1924-25 over the year 1923-24 is reported by the Department of Agriculture as the result of a survey and analysis of the entire industry. The net return this year is placed at \$2,712,000,000 compared with \$1,983,000,000 the previous year.

This means that the individual farmer has increased his takings from an average of \$764 to \$276. The rate of return on the farmer's invested capital rose from 1.8 per cent in 1923-24 to 3.6 per cent in 1924-25.

The gross income from the agricultural industry rose from \$11,218,000,000 to \$11,158,000,000. The principal gains were derived from grain and meat. The increased prices for wheat and hogs being the chief contributing factors. Receipts from grains rose from \$1,393,000,000 to \$1,534,000,000 while meat animals rose in value from \$2,147,000,000 to \$2,621,000,000.

It will be remembered that for some months during the winter and spring there was great activity in the grain and live-stock markets with constant reports of rising prices. This spelled renewed prosperity to the American farmer after his period of depression with the result that he has in his pocket \$730,000,000 of net cash income more than he had a year ago.

Nearly \$729,000,000 added to the income of a single class of Ameri-

cans means much in increased purchasing power and this reflects better times in many other lines of industry and trade. When the farmer has funds with which to purchase, factories far removed from the farming regions become busy and wages go into the pockets of city workers who otherwise might be out of jobs.

The survey of the departments includes all kinds and classes of farmers. While the figures on annual income do not look large it must be remembered that they are averaged for the whole farming community. While 1914 a year seems a small income, consideration must be given to the fact that any average figure must include the southern negro with a little cotton patch, who is delighted with a few hundred dollars a year as well as the large wheat farmer or ranchman of the western plains. The figures mean that the general level of income of all farm classes has been raised and that the percentage increase which may mean but a few dollars to one farmer means thousands to another.

The returns from farming still are far below what they were in the boom period of the war and the post-armistice days but show substantial gains over the depressed period. In 1918-19 farm products brought the enormous sum of \$15,719,000,000, with a net income to the farmer of \$1,821,000,000. The following year this had dropped to \$12,461,000,000 gross and \$4,642,000,000 net while in 1921-22 the low point was reached with gross income of only \$9,214,000,000 and net of but \$1,487,000,000. From that time there has been a steady gain the figures being as follows: For 1921-22, gross of \$9,214,000,000 and net of \$1,487,000,000; 1922-23, gross \$11,324,000,000 and net \$2,147,000,000; 1923-24, gross \$11,218,000,000 and net \$1,983,000,000; 1924-25 gross \$11,158,000,000 and net \$2,712,000,000.

The agricultural industry does not reveal itself from these figures as a highly profitable one on the average. The highest rate of re-

REVERENCE, MOOSE

Pharmers of Isle Royale Look on
Animals With Awe

DETROIT, Sept. 13.—The fishermen of Isle Royale are squatters for the most part. Michigan to them is Bill Lively, the game warden and Capt. Ellsworth. Lively is their governor; they are their own government after the summer cottages have gone. The better part of them spend the winter in Minnesota, although a dozen men and women too, who remain all year, making new nests in little log houses that they feel the island belongs to them and there is something uncanny, almost spiritual about their reverence for its moose. Each great bull trumpeting at the evening skies might be Thor pounding up the amygdaloid ridge with his hammer. The great swaying bodies, churning up the marsh meadows and spilling their blood over some blood-faced cow, might be old Norse Gods battling for a throne.

RATS DESTROY ARMY GOODS WORTH \$50,000

DETROIT, Sept. 13.—After destroying more than 450,000 worth of aviation material in warehouses at Duncan Field within a few months, hosts of rats and other pests responsible for the loss will be exterminated by the local corps of the chemical warfare service, under the direction of Lieut. G. A. Mackay, acting chemical officer, it was announced at Fort Sam Houston.

Responding to an appeal from Maj. Frank Lockland, commander of the air intermediate depot, the War Department has authorized the use of nearly 1250 liters of sodium cyanide and 3000 liters of hydrochloric acid in the offensive against the rodents.

California Here's Our New Plan

Halbriter's has united forces with Scheyer Inc. to raise the Standard of the Clothing Industry in order that Californians might have the finest tailoring and smartest fall styles.

THE DREAM OF THE DREAMER is civilization's "best bet." Fulton, Bell, Edison, Marconi, the genius of the automobile and the aeroplane all were dreamers and the world is bettered by their dreams.

... And so Halbriter's has dreamed of a new order of things in a commercial sense—dreamed of "super-clothes"—heart and soul clothes—the finest garments for men that super-effort and super-intelligence could produce to sell at moderate prices, \$65 to \$85.

... This thought became so indelibly impressed upon our very consciousness that for months we have dreamed and worked ceaselessly upon this new merchandising plan of ours—a plan that is destined to revolutionize the clothing business.

... In our determination to establish this new plan upon a concrete foundation we visited the foremost clothing manufacturers of the country. We talked with them; examined their products. Many of them are making fine clothes, but Halbriter's had a definite idea in mind—something better. The clothes we saw did not measure up to the Halbriter's Ideal. We then realized that to make our plan a success we must raise the standard of the clothing industry. And this we set out to do.

... The first step in this undertaking was to reach out to the great woolen mills of this country and in foreign lands. As retailers we could not do this so we sought out the man who did have access to these coveted markets—a man who could use through the same thoughts as we are looking through. We found this man in S. Scheyer, of Scheyer Inc.—well and favorably known for the quality of their product.

... Mr. Scheyer immediately recognized the importance of our idea. He had long cherished a similar ideal. He had the courage of his convictions.

... Inspired by the words of Theodore Roosevelt, every man owes something to the betterment of the industry in which he is engaged", Mr. Scheyer

welcomed the opportunity to tie in his genius and the productive energies of his institution with our plan, that we jointly might offer a finer grade of clothing than the world hitherto has known. He was ready to battle for the good of the industry.

... Thus it was that the source of production was reached and arrangements finally completed by which Halbriter's becomes the most "exclusive" clothing institution in the West, operating far in advance of the market.

... Halbriter's has always displayed many patterns that have been exclusive. Under this new plan, all will be "exclusive." This means that we can assure you of greater individuality, increased personality and absolute distinctiveness of attire. Our patrons will enjoy a decided advantage in the possession of these "exclusive" clothes as they could not possibly be copied under six months or a year.

... In manufacturing under this ideal plan Halbriter's will excel in advance styles and fine tailoring. Each of the innumerable operations required in the tailoring of these super-clothes is deftly executed by skillful hands by an entirely new and original method—absolutely foolproof. Accuracy is the keynote. It cannot go wrong. A perfect fit or drape is the result, and with all, these super-clothes are popularly priced at \$65 to \$85.

... Now, Friends we are ready to submit this new plan to you. On Tuesday, September 15, our formal Fall opening will occur. We wait with confidence your approval of this plan. We want you to see and inspect the most magnificent display of fine clothes ever attempted by any American clothier, and to study a plan in which gumption supercedes greed and idealism triumphs over commercialism.

Speaker's Talk Occasioned by Vinton Murder

(SPECIAL DISPATCH) CHICAGO, Sept. 14.—A sermon packed with sentences of denunciation, Rev. Blain, pastor of the First Christian Church here, today charged that the criminal element of the city was in open rebellion against the United States government. He charged that the criminal element is intimidating prosecution and witnesses, frightening them from jury service and preventing all who oppose them.

ROSENWALD SOCIETY'S CHILD

Donates Milk and Water Sympathy

Against Federal Control Charged

Talk Occasioned by Facta Murder

Sept. 13.—(LOCAL CORRESPONDENCE) Mr. Hyten declared the crime wave is the child of American society and that the underworld is encouraged by milk and water sympathy by American lawyers.

When criminals go on trial today there is money to pay their fines and money to hire eminent counsel to defend them," said Rev. Hyten.

There are Clarence Darrows eager to save from noose and prison. During long trials these Darrows do everything possible to cover their crimes; white-wash their guilt and mitigate their punishment. Of course, all of them are insane. In city, State and nation, criminals are organized to break down the law. When they are caught there is great public sympathy and their names become household words.

HUSBAND QUIZZED IN DRY LEADER'S DEATH

(EXCLUSIVE DISPATCH) VINTON (Iowa) Sept. 13.—Mystifying statements concerning the dying hour of Mrs. Myrtle Underwood Cook, the W.C.T.U. leader murdered here a week ago, were made today by Clifford Cook, her husband. Cook is under official surveillance while a check-up is being made of his assertion that he was in a nearby town on the night of the crime.

Though all testimony taken thus far has indicated that the dying woman's only words were "Save me, save me," Cook declared today that a moment before she died she had given the name of a Vinton man. That man, said Cook, is one who would have a strong motive to kill the dry leader. He was positive that his wife gave the name of her assassin.

Cook will take the witness stand when the inquest is resumed tomorrow. He has told in detail of his married life and of his movements the night of the murder, but officials declared they wished to put certain pointed questions to him.

SEASONAL RECORD SET BY NEW YORK WEATHER

(EXCLUSIVE DISPATCH) NEW YORK, Sept. 13.—New York had the hottest September 13 in its weather history today when the mercury rose to 84 deg. at 3:50 p.m. It reached 86 deg. Saturday at about the same time. Higher marks than 84 deg. have been frequent but not on the 13th. There were two heat prostrations in Manhattan.

THREE GENERATIONS DIE

(EXCLUSIVE DISPATCH) SALT LAKE CITY, Sept. 13.—Death came to three generations here within an hour when Peter Rengren, D. & R. G. Western employee for many years died at the family home, and an hour later his daughter Mrs. Mabel Rengren Craddock and her newly born babe died at a hospital.

ROSENWALD MAKES GIFT OF MILLION

Money Donated to Relief and Reconstruction Fund for Europeans

(EXCLUSIVE DISPATCH) PHILADELPHIA, Sept. 13.—In the presence of more than 1000 persons, many of them leaders of American Jewry, Julius Rosenwald, Chicago philanthropist, pledged \$1,000,000 toward the campaign of the joint distribution committee for European relief and reconstruction at a meeting here today.

Indorsing the project of the "back to the land" movement Mr. Rosenwald urged that his contribution be part of a \$9,000,000 fund which he hopes will be raised within three years for the rehabilitation on the land of Russian tradesmen, artisans and others who for years have borne the brunt of economic pressure in Russian cities.

Alhambra Soon to Open Annual Season of Song

(LOCAL CORRESPONDENCE) ALHAMBRA, Sept. 13.—The Alhambra Community Sing will begin the 1925-26 season on Saturday evening the 19th inst. in the high-school auditorium, with Hugo Kirchhofer again in charge as director. Clarence Kellogg will be the accompanist for the coming year. It was announced.

The sing association, starting its third season, has been one of the most successful of local community projects. Much interest is being shown in the forthcoming meetings and a larger attendance and wider scope of work is predicted by Mrs. Louise Harwood, president.

One of the features of the chorus is a group of women who have formed "The Serenaders," visiting and singing to the shut-ins of Alhambra and vicinity. Several quartets have also been formed under the direction of Mrs. Herbert Lake to furnish music for any occasion.

-eliminate chance in buying a washer

"Oh, please tell me!"
"Will the washer I am going to buy Really Wash?"
"How long will it last?"
"How much will repairs cost me?"
"Are there any parts which will wear out quickly?"
"Who will pay for new parts?"
"Where will I get them?"
"How long will I have to wait for them?"
"Who will service this washer?"

WHY TAKE A CHANCE?—
No Need for a Fortune Teller When You Buy

the **Maytag** WASHER backed by BONDED Service Guarantee and 18 Months Fire Insurance **Free**

SCHLUETER'S have never charged a Southern California Maytag Owner one cent for repairs or new parts, and now this most remarkable service is GUARANTEED to you in a signed BOND. A Separate Bond is also given you signed by L. B. Maytag—President of the Maytag Factory.

These TWO Bonds backed by the world's largest washing machine factory and the organization selling more washing machines than any other in the world, absolutely guarantee you against any possible deficiency, breakage or wearing out of any part of the Maytag Washer for a period of 18 months. This POSITIVE Signed GUARANTEE is also backed by the INDEMNITY INSURANCE CO. OF NORTH AMERICA.

One of the Bonds Also Carries a Fire Insurance Policy Protecting You for 18 Months in the Continental Insurance Co. of New York

IF THERE is anything else anyone can offer you to demonstrate their utmost faith in the quality of the product they sell—we don't know what it is!

You can see immediately that no concern could afford to offer such positive guarantees, no concern could induce TWO such companies as the Indemnity Insurance Co. of North America and the Continental Insurance Co. of New York to back any machine that did not possess complete ability to serve the buyer their intrinsic quality.

If the Maytag would not stand behind these signed Bonds—EVERYONE behind the Bonds would suffer such huge losses that the signing of them would prove pure suicide.

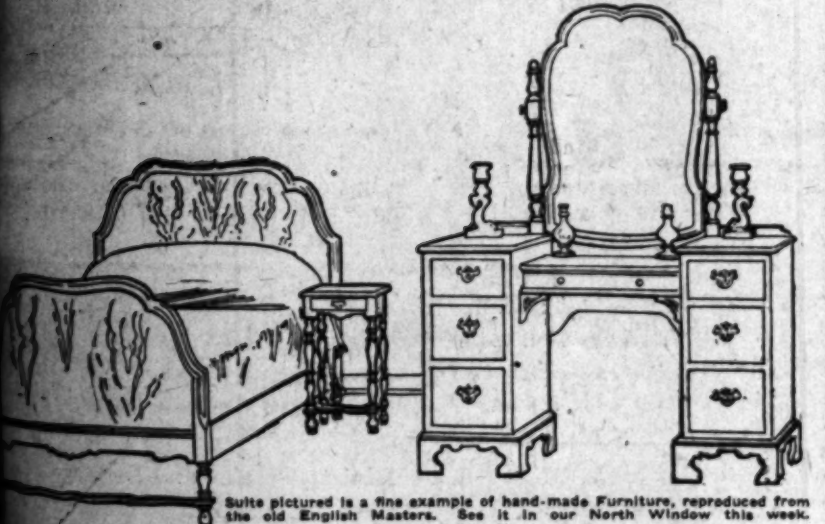

To believe in the Maytag as we, and the majority of the washer owners in the entire country do—it is only necessary to phone us to lend you a Maytag to try.

LOS ANGELES AGAIN SETS NEW PAC

PICKWICK STAGES LATEST WORD IN MOTOR TRAVEL

Franciscan Service Will Feature Speed and Comfort for El Camino Real Line

Los Angeles again strides ahead of the world in a new field—that of motor stage transportation. At 7 o'clock tomorrow morning the first parlor-buffet motor coaches will begin their maiden voyages.

The luxurious cars were designed in Los Angeles, made in Los Angeles by a Los Angeles company, and will be operated by the Pickwick Stages System of Los Angeles. They are the first motor stage coaches to include with many other refinements and luxuries a complete buffet for the preparation of meals a la carte and a well-appointed lavatory and toilet.

The coaches, two in number, will ply between Los Angeles and San Francisco daily, providing what is known as the Pickwick Franciscan Service. They will leave the Pickwick terminals in Los Angeles and San Francisco each morning at 7 o'clock and will arrive at the Pickwick terminals in their respective destinations each evening at 5:45 o'clock.

The immediate result of this innovation and radical improvement in highway transportation is the California Highway Indemnity Exchange, Suite 525 Pacific Finance Building.

New Pickwick Stage Coaches Have Smoker and Kitchen

The Pickwick Stages System tomorrow will put it and a duplicate into daily operation between Los Angeles and San Francisco. The \$17,000 coach has a kitchen and steward at the service of passengers. It has a complete toilet and a smoking compartment.

Obispo, Paso Robles, Salinas and San Jose.

Standards of motor stage travel are changed by these miniature rolling hotels, more of which are to be added to the Pickwick System. One need not leave them during the hours of travel. Each of the new parlor-buffet cars has five compartments, each a unit in itself and separated by glass doors from other parts of the coach. The driver's compartment is separated from the rest of the car and he leaves and enters by a separate door. This arrangement leaves his attention entirely for the wheel.

The ladies' compartment seats twelve on splendidly soft-cushioned reclining arm chairs, which occupy the forward portion of the car. The smoking compartment and observation section are in the back of the car with buffet and lavatory, on opposite sides of the car, separating the smoker and forward sections.

Chairs in the coach are nearbeds. They may be adjusted to four positions, one reclining to permit restful naps anywhere on the journey. A drinking fountain with individual cups is accessible. The lavatory contains a washbasin, towels, large mirror and flushing toilet. Stewards in the coaches look after comfort of passengers.

and at the touch of a button prepare hot or cold lunch in the well equipped kitchenette of the car.

Mary Pickford, the motion-picture actress, christened the first of the new Pickwick parlor-buffet coaches with pomp and ceremony at her studio. The inaugural trip was made to Santa Barbara for the benefit of Acting Mayor Workman, members of the City Council and other officials. Yesterday a number of newspaper men were taken to San Diego in one of the coaches. The service of these coaches, Pickwick Franciscan Service, drew its name from the Franciscan padres, who first trod the coast trail now known as El Camino Real, or the King's Highway.

The new service will not affect the six daily through-trip services now provided by the Pickwick System.

Pickwick Line Had Inception in Revolution

The Pickwick Stages System of today began more than thirteen years ago when forces of circumstances drove a mining promoter from strife-torn Mexico into the transportation business in San Diego.

A. L. Hayes owned a mining territory across the border but when the smoldering flames of revolution broke out he had to leave. He got a Ford automobile and began operating a stage line between San Diego and Escondido. It made the fifty-mile trip in two hours and fifteen minutes.

Now "Pop" Hayes is vice-president of the Pickwick Corporation whose luxurious cars go from San Diego to Escondido in one hour and fifteen minutes and besides that operate cars from the southern border to Portland. His organization now has 188 motor coaches operating over 8500 miles.

Line Got Name From Theater at San Diego

The Pickwick Stages System got its name from the Pickwick Theater in San Diego.

The forerunner of the present extensive system was a single-car stage plying between San Diego and Escondido. Its San Diego terminal was the street in front of the Pickwick Theater. The name stuck when the line was extended beyond the "scenic route" as the original line was called.

The name could hardly have been more appropriate. Stages were almost immortalized in Dickens' "Pickwick Papers."

Pickwick Stage System Selects McClaren Autocrat Cords for 'LEVIATHAN' of Highways!

SAFETY... Of paramount importance to the safety of passengers in a stage are tires. McClaren Autocrat Cord tires are the SAFEST TIRES IN MOTORDOM.

COMFORT... In long trips such as the "FRANCISCAN" will take, passenger comfort is of the utmost importance. McClaren Autocrat Cord tires are the MOST BUOYANT TIRES ON THE MARKET.

MILEAGE... With more McClaren Autocrat Cord tires delivering OVER 25,000 miles of service than UNDER, Pickwick Stages System are purchasing LONGEST MILEAGE AT MINIMUM COST.

FULL CREDIT TO DESIGNER OF COACHES

Work of Dwight Austin Sets New Milestone in Motor History

Credit for creation of the parlor-buffet motor stage coaches to go into service tomorrow for the Pickwick Stages System is due Dwight Austin, designer and builder of the Pickwick Corporation. Company officials said yesterday.

The creation of the coach with a buffet and complete toilet compartments marks a milestone in highway travel routes. Two of these rolling hotels, the triumph of Austin's skill and now ready for service, are the first of their kind in motor history.

The big cars are thirty-two feet long. The lower part is gray and the upper part blue. Three doors open on the curb side. The radiator is nickel-plated. Distinctive stream lines characterize the coach. It seats twenty-two passengers and provides them with Pullman-like conveniences.

Pop Hayes Tells of Difficulty in Early-Day Route

One of the early stage lines of the Pickwick Stages system was between San Diego and El Centro. Long before cement roads made travel a pleasure, the road led down through Devil's Canyon and over thirty miles of shifting sands into Imperial Valley. The journey consumed twelve hours and the fare was \$12. Now the time is four and one-half hours and the fare is about one-third the original.

"Back in those days," "Pop" Hayes, vice-president of the Pickwick Corporation, said, "we sold accommodations in the doorway of the stage for 12 less than full fare. There was another choice location made by covering the tool box on the running board with a blanket. We knocked off 14 for a ride out there."

FORD'S TEACHER DIES
DETROIT—Miss Emma Hill, a school teacher for forty years, who taught Henry Ford in the "little red schoolhouse" near the Ford farm at Dearborn, is dead.

PICKWICK TO BUILD DEPOT IN SAN DIEGO

Combination Hotel and Terminal for Coaches to Cost \$375,000

A third splendid motor stage line terminal to cost \$375,000 soon will be added in San Diego by the Pickwick Corporation to the two first-class terminals it already has built in Los Angeles and San Francisco at a cost of \$800,000. The San Diego terminal will include a hotel, the site, First and Broadway, in the city's downtown shopping district, already has been leased, company officials have announced, and construction will begin in the next two weeks.

The terminal-hotel will rise eight stories, contain 124 rooms and a spacious garage in basement. The hotel will be known as the Pickwick Hotel.

PLAN THIRTY MORE STAGE

Manufacture of thirty more of the new-type, motor stage coaches like the two that the Pickwick Stages System will have in its Los Angeles-San Francisco line tomorrow will begin here.

The construction program, it is announced, is being carried out by the company's offices, which will be making these improvements in the present force of more than 100 men.

"It is expected to use these innovations," says the announcement, "on California highways from the Mexican border to Portland."

Congratulations!

EXPANSION OF LINES RAPID

In the course of a few years after its inception the Pickwick Stages System of the southern part of the State acquired routes from San Diego to El Centro to all points in the San Diego Mountains and both the Coast and Inland routes from San Diego to Los Angeles.

The system first assumed gigantic proportions when the northern division, consisting of the Coast Route from Los Angeles to San Francisco and other lines radiating from Los Angeles, joined the southern division. Charles F. Wren, president of the Pickwick Corporation, is credited with the success of the system.

Or, and as far south as San Diego and El Centro, covering 2500 miles. Pickwick Corporation operates the only system that runs between Los Angeles and San Francisco on through schedules and the only one that travels the coast route along El Camino Real, trail of the padres and their historic creations.

SAN DIEGO
El Centro

From San Diego, lines radiate to El Centro over two mountain routes. The trip consumes a little more than four hours. At El Centro one may transfer to motor stages bound for Tucson, Phoenix, El Paso and other Arizona, New Mexico and Texas cities.

The mountains of San Diego, rich in vacation possibilities, are dependent almost entirely on Pickwick lines, which constitute a network connecting resorts in the back country.

The trip between Los Angeles and San Francisco is considered one of the most beautiful and representative California trips. It displays almost every kind of scenery in the State, ocean and mountain views, oil fields at Santa Maria, the great Santa Clara Valley fruit country, world's largest bean ranches at Conejo, sea oil wells at Carpinteria and many other attractions.

The rich San Joaquin Valley is reached by way of Tehachapi and Bakersfield from Los Angeles. Bakersfield has access to San Francisco by the shortest route, directly across coast hills to Paso Robles and thence along the coast to the bay cities.

VALLEYS TIED UP
Fresno, metropolis of San Joaquin Valley, is connected with the coast by the scenic Pacheco Pass highway. It is one of the latest Pickwick acquisitions, and also the lines from Fresno to Coalinga, Lemoore, San Joaquin, Clovis and other inland cities.

Pickwick stages travel the shortest way to Santa Ana through Santa Fe Springs, Fullerton, Anaheim and Orange. With their definite schedules each day, motor coaches tie these cities closely to Los Angeles. This line carries the heaviest traffic in the Pickwick system.

The longest Pickwick line is one of 124 miles between San Francisco and Portland. This trip, taken entirely in daylight, presents the incomparable majesty of Mt. Shasta, the United States' only active volcano, Lassen Peak, and California's primeval timberland.

MOTORS MAKE INROAD ON RAILWAY REVENUE

(EXCLUSIVE DISPATCH)
ST. LOUIS, Sept. 12.—Buses and automobiles continue to make heavy inroads in passenger traffic, according to the monthly report of the Missouri Pacific Railroad, issued by L. W. Baldwin, president.

Baldwin's report shows passenger earnings of the Missouri Pacific Railroad for the first eight months of the year are \$18,825 less than for the same period last year and \$1,521,545 less than for the same period in 1923.

"DIRECT-UP" will direct you to the places that sell Estate Gas Stoves or any advertised product.

Write or phone The Times, Metropolitan 9760.

We wish to extend our congratulations to the Pickwick Corporation for successfully placing in operation their line of de Luxe Parlor Cars running between Los Angeles and San Francisco.

In choosing the Egyptian Automobile Finish for application over the interior and exterior of these cars, the Pickwick Corporation is assured of a rich lustrous finish that will continue to enhance the beauty of their cars over a period of years.

FINANCING OF SYSTEM ROMANTIC

Pickwick Expands from One Car in 1912 to Line With \$2,000,000 Capital

The story of Pickwick Stages System success is a romance of finance.

Began in 1912 with one small car, developing and consolidating under a central head, the system, according to company reports, in 1919 carried more than 16,000 passengers and earned an operating profit of \$184,988. The company estimates that its 1925 earnings will be 25 per cent greater than those of 1924.

"Owners of Pickwick Corporation common stock," a company statement says, "receive cash dividends every three months. Net earnings of the system, before taxes and depreciation were deducted, amounted last year to a rate of 25 per cent on outstanding common stock as of December 31, 1924, after allowing for dividends on outstanding preferred stock."

"From operations in 1924, \$151,451 was added to surplus. The annual dividend requirements on the entire authorized amount of preferred stock is only \$60,000. Owners of common stock receive entire benefit of net earnings. Holders of the preferred receive 5 per cent interest per year."

Acquiring the Pickwick Habit

Pickwick Stages System is expanding more and more—to catch up with the demand.

We, likewise, are leasing additional space—adding more, up-to-date, equipment to keep up with the ever-increasing demands of our patrons.

PIERCE ARROW

According to officials of the Pickwick Motor Stages, two of their Pierce Arrow busses have gone over 800,000—are still in service and paying dividends to the Pickwick Company.

This remarkably long life is built into the Pierce Arrow products by a system of test and retest on every unit that goes into the complete chassis.

The latest Pierce Arrow to go into Pickwick service is a luxurious motor driven parlor car built on the Pierce Arrow chassis. It is equipped with a DeLuxe smoking compartment, buffet kitchen to serve hot drinks and sandwiches, lavatory and every convenience for the traveler.

The Pickwick Company operates a total of 82 Pierce Arrow Busses.

SAFETY FOR PASSENGERS IS PROVIDED

New Pickwick Cars Have Every Feature Necessary to Eliminate Danger

"Safety First" really means something on the lines of the Pickwick Stages System, Charles F. Wren, president and general manager of the Pickwick Corporation, said yesterday. He pointed out that last year the system's cars traveled 20,000,000 passenger miles without a single fatal accident to any passenger.

"This splendid record," Mr. Wren said, "is due to a number of causes—care in picking men of character and steady nerves, mechanical perfection of our coaches and daily inspection of every part of the mechanism with particular attention to brakes, safety lights and tires."

"The new type of parlor-buffet coaches, to be used tomorrow and thereafter for the first time in history provides additional safety—first features. The driver is in a compartment by himself and a series of fender lights will outline the car for those who pass it."

"For the first time in motor history Gruesz air springs have been applied in the new-type coaches to rear as well as to front springs. This eliminates danger of sideways and lemons vibration of the car which makes for easier riding as well as safety."

"Extra large brakes add security. Our brake drums are five inches wide and eighteen inches in diameter and with them the heavy coaches can be brought to complete stop in a very short time. Double rear wheels and non-skid tires add more safety in braking."

"Greatly increased strength is added to the coaches by reinforcing the whole frame with heavy steel plates and by cross-bracing the chassis with channel iron."

LEADERS

Pickwick's new Stage de Luxe is the last word in motor-stage comfort and convenience.

See's Famous Home-made Candy is the last word in candy satisfaction. Each is the leader in its field.

There is an attractive white SEE'S CANDY SHOP in the Pickwick terminal at 6th and Los Angeles, a constant, convenient reminder that there is no better travelling companion—and no happier gift to take with you than a box of See's Famous Home-made candies.

There are nine SEE'S Candy Shops conveniently located throughout Los Angeles, fully stocked with every kind of candy imaginable. All of them good tasting and wholesome.

... no better candies anywhere at any price and all 80c a pound.

PIERCE ARROW

According to officials of the Pickwick Motor Stages, two of their Pierce Arrow busses have gone over 800,000—are still in service and paying dividends to the Pickwick Company.

This remarkably long life is built into the Pierce Arrow products by a system of test and retest on every unit that goes into the complete chassis.

The latest Pierce Arrow to go into Pickwick service is a luxurious motor driven parlor car built on the Pierce Arrow chassis. It is equipped with a DeLuxe smoking compartment, buffet kitchen to serve hot drinks and sandwiches, lavatory and every convenience for the traveler.

The Pickwick Company operates a total of 82 Pierce Arrow Busses.

Santa Clara Guard Quits Gridiron on Advice of His Physician

BY A. P. NIGHT WIRE

SANTA CLARA, Sept. 13. Jack Nolan, nationally known guard on the Santa Clara University football team, has decided, on advice of his physician, not to play this season. He suffered an injury to his back last season. The late Walter Camp picked Nolan on his third all-American team for 1924. Nolan was included on all-star selections by several other experts. His loss will be a serious blow to the football aspirations of Santa Clara, which this season goes under the tutelage of Adam Walsh, center on last year's undefeated Notre Dame eleven. Nolan will enter Loyola College in Los Angeles, where he will continue the study of law.

COSTA MESA TO HAVE REAL TEST

Marine Will Drill Old Area
at Newport Beach

Expects to Pick Up Good
Sand Below 3000 Feet

Tract Situated Between Two
Huntington Wells

A definite test of the deep sand
possibilities in the Costa Mesa district
at Newport Beach is planned by the
Marine Corporation in its No. 53 well
which, at 1150 feet, has reported good
gas showings. The Marine expects to develop
a prolific oil sand below 3000 feet, and
bases its conclusions on other wells which
have been drilled to about that depth years
ago. Marine has obtained 140 acres at
Costa Mesa, the tract lying between two
wells which were put down fifteen years
ago to 3600 feet and 3000 feet.

HISTORY OF AREA

The wells in question were
drilled by George Huntington, who
was president of the Newport Bay Oil
Company, and was interested in other oil
ventures in the Newport district. The first
Newport Bay well was drilled on the Ir-
vine ranch, found oil sand at about 2600
feet. The sand produced light green oil in
small quantities, on the pump, but after a
time the hole caved in and the project was
abandoned.

The Newport Bay Oil Company
drilled a second well on the Newport Heights
tract, but after going 3000 feet the hole was
abandoned without having developed anything
important in the way of oil sand, although a
considerable thickness of shale was penetrated,
which showed some oil.

ANOTHER VENTURE

Another well was put down
about half a mile northwest of the Newport
Bay No. 1 by the Balboa Oil Company. This
hole, according to the company's report, pen-
etrated about 2100 feet of brown shale, with
a streak of oil sand at 1800 feet. Below 2600
feet the bit penetrated a hard cap, below
which strong gas pressure was developed.

According to George Huntington,
who drilled the hole, the gas was so heavy that
the tools were blown out of the hole. Below that
point about 120 feet of oil sand was drilled
through, but was not productive, perhaps because
of inability to control the water.

These deep showings are the ob-
jective of the Marine Corporation at Costa Mesa.
Shallow showings will be tested, but nothing val-
uable is expected much above 3000 feet.

GOLD DUST PLANS FOR CYANIDING

Company is Preparing to
Secure Better Recovery of
Ore Values

EXCLUSIVE DISPATCH

OATMAN (Ariz.) Sept. 13.—Fi-
nanced in Los Angeles, the Gold Dust
Company is preparing to in-
stall cyanide tanks, which has re-
sulted in a recovery of more than 60 per
cent of the ore value. Sample lots
of ore sent to the Tom Reed mill
returned values of from \$12 to \$20 a
ton. Much richer ore is being
taken from the water near the
property. The mill is of fifty tons
capacity and of modern construction.

The Tom Reed mill now is
handling about 160 tons a day,
about half of it from the 700 level
of the Reed and fifty tons from the
Astec lease. This is considered a
remarkable record for a property
abandoned by its owners as exhausted.

The milling machinery is work-
ing exceptionally well and the
grinding is finer than the tube mill
has done before, while the recovery
percentage is high and the bul-
lion notably pure. Another mill
unit is being prepared to care for
the needs of local custom ore. Re-
newed activity is expected in the
Big Jim and United Eastern prop-
erties.

Oatman is "coming back" at a
rapid rate, with many new busi-
ness houses started, while the
mines of the camp are showing
renewed activity.

Midway Tract Turned Over to Taft Drilling

EXCLUSIVE DISPATCH

FELLOWS, Sept. 13.—The Union
Midway Oil Company has
turned over to the Taft Drilling
Company for operation its 760
acres extending across the entire
north end of section 19-31-23, at
the western edge of the Midway
district. The No. 1 well, drilled
ten years ago at the southwest
corner of the lease, adjoining the
Brookshire Oil Company's lease,
had declined to fifteen barrels of
oil per day, along with considerable
water. When the Taft Drilling Com-
pany started cleaning out down to
2900 feet.

Placed on the pump two weeks
ago the well started to flow from
50 to 100 barrels of clean oil and
with about 200 feet of sand and
shale drilled into it.

It looks like a good property,
considering the shape the old well
was in. A new well will be start-
ed soon, for a better test. A mile
to the east the Associated Oil
Company had two strong gas wells
in the 2500-foot horizon that have
turned out a lot of commercial gas.

PIPE LINE RUNS FIRST OIL

Petroleum Carrier Conveys Initial Load from Taft to
Pan American Tanks at Watson Junction

Requiring just about one
month for the trip, the first
consignment of oil to travel
through 125 miles of pipe line
recently built by the Los An-
geles Midway Pipe Line Com-
pany, from the Midway oil
field, flowed into the tanks of
the Pan American Petroleum
Company at Watson Junction, Cal.
Saturday morning, at the rate
of 1550 barrels per hour.

The crude oil was turned
into the line at Taft early in
August by J. C. Burnett, su-
perintendent, and made the trip
by easy stages, testing for
a few days at each of the
five pumping stations along the
way, while the line ahead
was being tested.

Although the first oil re-
quired several weeks to pass
through the pipe line, the time
required for subsequent pas-
sage from Taft to Wilmington
will be only three days. The
oil enters the line at Taft,
where it is pumped to the foot
of Wheeler Ridge. There an-
other set of pumps pushes it
through the line and over the
crest of the mountains to
Graperine, where a third set
of pumps pumps it to Tejon,
near the crest of the ridge. There
another station pushes the oil
over the ridge and down to
Newhall, where it receives the
final impetus that carries it
through to Wilmington.

The rate at which the first
oil arrived at Wilmington, was
considerably in excess of the
expected capacity of the line.
Its capacity 30,000 barrels
a day, and 1550 barrels an
hour is at the rate of 17,000
barrels a day. The average
load is expected to be about
20,000 barrels a day during the
coming year. The pipe line is
ten inches in diameter. It cost
approximately \$4,000,000.

OIL HIT ON NEW STRUCTURE

Strike in Well at Farmington, New Mexico Following
Test Abandoned a Year Ago

EXCLUSIVE DISPATCH

FARMINGTON (N. M.) Sept. 13.—The completion of an oil well
on a new structure in the Farmington district was the chief topic
of discussion in the San Juan Basin during the past week.

The Continental Oil Company,
associated with the Santa Fe Com-
pany, the latter representing the
Munoz interests in this field, drill-
ing on Table Mesa, on Section No.
3, 25-17, at a depth of 1510 feet
struck a sand that flowed oil over
the top of the derrick. The well
was mudded up and a control
valve was put on, but some oil
continued to come up in spite
of these precautions.

At the time the strike was made
the hole was not cased, so the flow
could be controlled. Since then
the casing has been run and has
been cemented in. It is expected that
the well will be drilled in tomorrow
and a test made of its capacity.

The oil is of about the same
quality as that found in the wells
on the Hogback dome, which is
twelve miles north of the new
strike, and practically the same
as that of the wells on the Red
Mesa district, which is about fifteen
miles northwest.

The new structure was drilled
about a year ago by the Producers
and Refiners Corporation for the

MINING MEN WILL CONFER

State and Federal officials will
attend the initial regional min-
ing conference at Grass Valley to-
morrow, Lloyd Root, state min-
ing geologist, and J. J. Delahide,
of the United States Bureau of Mines,
have both stated that they will
be in attendance.

Charles W. Merrill, chairman
of the executive committee of the
Mineral and Allied Industries of
California, R. I. Kerr, of the Cal-
ifornia Metal and Mineral Pro-
ducers Association; James S. Hill,
of the California Chamber of Com-

Standard Rig to Government Oil Make Real Test at Terra Bella Maricopa Tract

EXCLUSIVE DISPATCH

TERRA BELLA, Sept. 13.—The
low derrick for the drilling ma-
chine at the southwest edge of
town, alongside the railroad, has
been dismantled to make room for
a standard derrick, Birch & Royer
of Los Angeles having undertaken
to drill a real test well. Mr. Royer
recently visited Terra Bella to
look over the situation.

The Pioneer Development Com-
pany's test, one mile west of the
highway between Terra Bella and
Porterville, is standing idle after a
second cementing at 654 feet, a
little oil showing with the water.
A mile to the southeast the Shan-
non Oil Company's second cement
job failed. On the adjoining lease
the Hub Oil Company has cemented
its Hastings No. 2.

Two miles west of Ducor the
Hinckley test is drilling in hard
sand at about 3700 feet, with no
showing since a pocket of gas was
mudded off at 3620 feet.

In the western part of Tulare
county the Dinuba Development
Company appears to have made
but little progress since arranging
for a drilling rig. The town was
anxious to have natural gas, and
several gas showings in the old
Tulare Lake bed looked encourag-
ing.

These listed wells comprise Tulare
county's present oil and gas
activities.

OIL FLOW SAVED BY NEW DEVICE

Company Uses 'Water Witch' to Protect Well

High-Test Oil Obtained After
Salt-Water Fear

Brea-Olinda Producer Gives
1080 Barrels Daily

By using the "water witch," an
electrical device invented by a re-
sident of Riverside and operated by
local oil men, the Brea Canyon Oil
Company has just succeeded in
making a good producer out of its
No. 37 well in the Brea-Olinda
field, after it showed all the sym-
ptoms of being a salt-water pro-
ducer.

The well was flowing yesterday
at the rate of 1080 barrels a day,
which is a trifle better than most
of the new producers in that field.
The output is almost pure oil, the
cut being only six-tenths of 1 per
cent. The well is producing from
both sands, the depth of the pro-
ducing formation being about 1100
feet.

When the well was completed
about ten days ago it came in flow-
ing salt water. The moisture
proved to be a real problem, and
company officials decided to try
the "water witch." When it was
placed in operation the flow of
water was found to be coming in
at the bottom of the hole.

Company officials said yesterday
that they promptly pulled back
from 2650 feet to 2525 feet, where
they cemented off the salt water
and brought in the oil. The out-
put tests 26 deg. gravity, which is
a little better than the ordinary
Brea-Olinda oil.

The Fullerton Oil Company com-
pleted a well in the Brea-Olinda
field about a month ago, and re-
ported to have the earmarks of
a small producer and is making
considerable water. It was report-
ed yesterday that the point at
which the water is coming in has
not yet been located.

Company officials said yesterday
that the company's Orange No.
3-A, which was completed in Brea
Canyon about a month ago, is
a 2400-barrel producer, has settled
down to an output of between 1800
and 1900 barrels a day.

Shell's No. 2 in the same
field is reported as being down
4350 feet, and in the oil formation,
with, perhaps, 100 feet less than
before it will be ready for com-
pletion.

OIL QUEST AT GALLUP IN OFFING

Eastern Capital to Aid
Jerome Man to Treat San
Juan Basin Area

EXCLUSIVE DISPATCH

PHOENIX, Sept. 13.—Tom
Smart, a Jerome mining man, who
is managing the Holbrook oil-well
operations at Holbrook, states that
he has organized a new corpora-
tion which soon will start drill-
ing five miles north of Gallup,
N.M., in the San Juan Basin.

Capital has been secured in
New York and Boston, on the ba-
sis of reports made by Geologists
Railroad and under generally un-
favorable conditions. Possibly
\$1,000,000 has been spent thus far,
about half that sum on the Tay-
lor-Fuller well, now opened by
the Great Basin Oil Company.

Oil and gas have been found in
the Taylor-Fuller, Admans and
Holbrook wells, each still short
of assured success. Each has
a heavy flow of salt water,
which is expensive to handle.

Mr. Smart is hopeful of suc-
cess in the three major drilling
operations around Holbrook. The
field has been a difficult one to
prove, with drilling mainly through
flint rock and under generally un-
favorable conditions. Possibly
\$1,000,000 has been spent thus far,
about half that sum on the Tay-
lor-Fuller well, now opened by
the Great Basin Oil Company.

Oil and gas have been found in
the Taylor-Fuller, Admans and
Holbrook wells, each still short
of assured success. Each has
a heavy flow of salt water,
which is expensive to handle.

SHAFT SINKS RAPIDLY

Reorganized Silver King Pushes
Work at Sonora Mine

EXCLUSIVE DISPATCH

SONORA (Cal.) Sept. 13.—The
shaft of the Geraldine mine of the
reorganized Silver King Mining
Company at Confidence is now be-
ing pushed downward with three
shifts a day, progress being fa-
cilitated by the power plant which
was recently completed.

The property was inspected last
week by James Garfield and J. I.
Herr of the San Francisco Stock
Exchange, and Judge Charles Blen-
man of Tucson, Ariz., and Ralph E.
Pearce, president, and Norton
Walt, vice-president, of Bryson &
Co., of San Francisco, who were
much interested by the present
showing of high-grade and milling
ore.

Keeping Pace

Keeping pace with the develop-
ment of Los Angeles and adjacent
communities, CALIFORNIA BANK
announces the opening of branches
in Alhambra, San Gabriel, East San
Gabriel and Northeast Los Angeles.

Thus, the whole San Gabriel Val-
ley will have the modern banking
facilities its development and growth
warrant.

CALIFORNIA BANK has always
been a factor in the growth and de-
velopment of communities it serves,
and points with pride to its efforts in
this regard.

HEAD OFFICE 625 So. Spring St.
LOS ANGELES

ASSOCIATED GAS AND ELECTRIC COMPANY

To the Holders of Secured
Gold Bonds 6 1/2% Convertible Series Due 1954
Rights for 6 1/2% Interest Bearing Option Warrants

The Board of Directors has authorized the issuance of stock-
holders' rights to subscribe for 6 1/2% interest bearing option
warrants to holders of Gold Bonds of the Associated Gas and Electric
Company, Inc., at the rate of one warrant for each \$100 of Gold Bonds
owned on or before September 15, 1925, for \$20. No call may be made
for each share of preferred stock into which the Bonds will be
convertible, or 11 warrants for each \$1000 Bond.

The 6 1/2% Interest Bearing Option Warrants, \$25 paid, will bear
interest, payable quarterly at the rate of 6 1/2% per annum, and
when fully paid, each Option Warrant will be exchanged (after
September 1, 1926) for either \$100-4% Debenture Bond or one
share of the common stock of the Associated Gas and Electric Com-
pany, Inc., at the option of the holder. The warrants will also carry
dividend rights on the common stock of the Associated Gas and Electric
Company, Inc., in either case one-half share of common stock.
They will also carry detachable Stock Purchase Rights entitling
the holders to buy one share of common stock for \$25 after
March 1, 1926, and on or before September 1, 1927, or thereafter
and on or before September 1, 1928, for \$20. No call may be made
for payment before January 1, 1926, of any installment of the bal-
ance of \$60 of the subscription price, nor more than \$10 per call,
not at intervals of less than 90 days.

Holders of Bonds may obtain their certificates of "rights to sub-
scribe" by written application to the Company, stating the name,
principal amount and serial numbers of the securities held, with
proof of ownership of the bonds certified by a reputable security
dealer, bank, or trust company. Prompt application should be
made, as "rights" expire September 10, 1925.

6 1/2% Convertible Secured Bonds Due 1954 will be accepted in
payment for Option Warrants on the basis of one \$1000 Bond for
30 Option Warrants, \$25 paid. This is equivalent to 105 (the call
price) "face" for these bonds. Such bonds are to be so tendered in
payment through an investment security dealer participating in under-
writing the offering to stockholders of these Option Warrants.

Circulars descriptive of the earnings and properties of the Com-
pany, particulars of the Option Warrants and the securities
covered thereby, and application blanks, may be obtained from your
security dealer or the Company, 61 Broadway, New York City.

M. C. O'KEEFE,
Secretary.

ROBBERS RAID HOSPITAL SAFE

Bandit Pair in \$600 Haul at Good Samaritan

Office Manager Victimized at Pistol Point

Thieves Make Get-away After During Noon Theft

Walking quietly into the Good Samaritan Hospital, 1243 Wilshire Boulevard, yesterday noon, a tall, raw-boned, well-dressed man, flourished a gun in front of L. K. Brown, business manager of the institution, who was checking accounts in the superintendent's suite in the main portion of the building. The man, who was armed with a .38 Smith & Wesson, asked the superintendent to open a safe in the main portion of the building. The man, who was armed with a .38 Smith & Wesson, asked the superintendent to open a safe in the main portion of the building. The man, who was armed with a .38 Smith & Wesson, asked the superintendent to open a safe in the main portion of the building.

HOLD-UP DESCRIBED

According to the story Brown told the police he was working over the books in the office on the first floor when he heard someone enter from the rear and close the door. Believing it was one of the nurses, he paid no attention until a man's voice said: "Do you see that?"

Brown looked up and saw a man about 40 years of age, in a gray striped suit, holding a large black revolver. He advanced from the door and motioned Brown into a closet in the room.

"You better stay in there five or ten minutes because I'm going to do a little work outside," he told Brown.

Brown then heard him open the door of the room on the hospital corridor and another man came into the room. Brown then heard him open the door of the room on the hospital corridor and another man came into the room.

A few minutes before the robbery was staged, an ice man in the institution declared he saw two men sitting in chairs in the corridor, but it is not known whether or these were the bandits. During the robbery a telephone girl was on duty around the corridor.

The man who forced him into the closet, Brown told police, was about six feet in height, weighed about 185 pounds and had dark brown hair. He wore no cap or hat but was respectfully dressed. He also had about a two-weeks-old mustache, Brown said.

Police yesterday were taking finger prints, which were found on the safe and cash drawer, for comparison with records.

'KIDNAPED' WIFE RAN AWAY

Women's Departure, From Husband's, Lands Innocent Men in Jail as Abductors

Two wives left their husbands temporarily late Saturday night. The wives are Mrs. Fae Bernstein of 2310 Leeward street, and Mrs. Ruth Vall of 7422 1/2 South Figueroa street.

A misunderstanding with their husbands during a little party at the home of Mrs. Vall caused the trouble, according to University Police. Investigating officers gave the following explanation:

Mrs. Bernstein and Mrs. Vall husband and she had been kidnapped. Mrs. Vall and her husband chased the "kidnapers." Mr. Bernstein, who drives a small car of street popularity, couldn't make enough speed to get in at the finish.

STOP CAR. At Thirty-eighth and Figueroa streets the Vall forced the oil workers and Mrs. Bernstein into the curb. Two police officers were standing on the corner and conveyed the party to University Station.

Bernstein and Morris were held on suspicion of kidnapping. Detective Lieutenants Houghton, Raper, Magnus and Sullivan questioned Mr. and Mrs. Vall and Mrs. Bernstein. As a result of the investigation the two oil workers were released.

Mr. and Mrs. Vall went home to their home. Mrs. Bernstein drove home alone. Well, the only thing I know is that I am building myself a castle so I can sit back and laugh at the world now. It's going to cost me a fortune but I guess I can sit in it and laugh at the public with pleasure.

DESERT MAN OF MYSTERY VISITS (Continued from First Page) and that he is leaving Los Angeles some time Tuesday. If he has any business matters here he did not tip it off during an hour's conversation.

But he did bring into Los Angeles with him an interesting story of what has been going on during the last seven years in so far as he alone is concerned.

First to go back into a little history about Death Valley. Scotty, he has a fortune—a big one—that comes some place from the wilds of Death Valley, his home. Whence it comes nobody knows but Scotty himself and from his conversation he indicated he will take the secret with him to his grave.

FORM \$3,000,000 LOAN COMPANY

Three Institutions Now in Operation Absorbed

Chain of Building and Loan Associations Planned

Hollywood Banker Outlines Details of Project

Formation of a new \$3,000,000 holding company to control and operate a State-wide chain of building and loan associations, and the absorption into the plan of three institutions now in operation, was announced yesterday by Gilbert H. Beesmyer, Hollywood banker.

The project is sponsored by the financial group, who have been associated with the development and operation of the Guaranty Building and Loan Association of Hollywood, the North American Bond and Mortgage Company, and the Central Bank of Hollywood, he said.

Well, the only thing I know is that I am building myself a castle so I can sit back and laugh at the world now. It's going to cost me a fortune but I guess I can sit in it and laugh at the public with pleasure.

KILLED IN DUEL WITH OFFICER

"Hamburger Doc" Shot During Fight in Cafe

Fires at Policeman Going to Aid Angelino

Judiciary Believed Behind Start of Row

W. W. Allenbaugh, 54 years of age, lunch stand owner of Arcadia, known throughout the foothill section as "Hamburger Doc," was shot and almost instantly killed early yesterday morning by Patrolman Charles W. Pardue of Arcadia. The shooting occurred in the rear of a cafe where Allenbaugh was the owner of a lunch stand.

As the officer intervened, Allenbaugh is said to have turned on him and fired three shots. The officer, who was being severely injured, was struck through the chest. The shooting took place in the rear of a lunch stand owned and operated by Mrs. Orla Martin, formerly a nurse, who was the only woman and the three principals.

SENTENCING IN "BARBER" CASE TODAY Manager of Notorious Cafe Appears in Federal Court on Nuisance Charge "Hamburger Doc" convicted in federal court of maintaining a nuisance at the old Borromeo Cafe, 1243 Wilshire street, faces federal sentencing today.

PEN POINTS
Too many laws can make for a government unpopular.
Some men grow up to be big, and some just swell above the rest.
The self-made man generally makes himself at home.
Stretch the truth and it is apt to fly back and sting you.
It is only man who makes it hard for himself to make a living.
A bright spirit can lighten the heaviest toll.
The man who can laugh when he isn't amused is always popular.
Some husbands have a dim, while others grow all over the house.
"Don't worry" makes a better motto when you add "when".
Left-handed compliments sometimes turn out all right.
The big opinions of a small man naturally never fit him.
It may be better to be given the air than to be a flat tire.
Many enjoy the pleasures of life but not the pleasure of living.
Too many of us are apt to consider yesterday at the expense of tomorrow.
Fortunate are those who manage to penetrate the disguise of life's blessings.
Most men have two objects in life: the first to become rich and the second to become richer.
There are, however, a lot of men who are not business men who could be a better for a fortune.
In some families there is a habit of worrying about what happened last month's money.
Failure is not a disgrace, but a lot of people act like it is a thing to be proud of.
The only thing as bad as having too many relations who visit you is not having any who can visit.

San Diego Army and Navy Academy
"The Coming West Point of the West"

Opening Day, Next Thursday, Sept. 17th

Notice: Because of the continued interest in his Academy, Col. Thos. A. Davis, President, will extend his stay at the Alexandria Hotel through today, the 14th, and tomorrow, the 15th. And will be on the Mezzanine Floor from 10 a.m. to 6 p.m.

On account of the increased enrollment for the Fall Semester, it has been necessary to add 17 new bungalows, now nearing completion.

The Academy is the outstanding preparatory school of the west. It prepares for College, West Point and Annapolis, with a Lower School for Younger Boys. It has always enjoyed the University of California's highest scholastic rating, Division "A." It is the first private school on the Pacific Coast to secure West Point accreditation. Its military training and discipline are conducted under War Department supervision. It has always stressed Christian character training and fostered real Americanism.

The Woman and Her Job

BY VALERIE WATROUS

Questions concerning the problems of women will be answered in this column if
addressed to Mrs. Watrous at the Times.

WIDOWS AND ORPHANS

She lunched with me ten years ago. A friend whose guest she was brought her to the luncheon. Diminutive is so often applied to women that it has lost value, but I don't know how to describe her unless I use that word. She was under five feet tall; a woman in miniature. She wore her clothes like a French manikin; and she was beautiful in feature, line, coloring.

The same friend entertained me last week. All that was left of Diminutive's prosperity, she told me, was the home. Her husband had died and had left a flourishing business. Diminutive had been married at 15 years of age, her mother had died when she was very young, and she knew nothing of the world of commerce.

There were two children, a daughter of high-school age, and a little boy. The brother-in-law offered to buy the business at a very low figure, nothing down and \$100 a month. His lawyer told Diminutive it was as good an arrangement as she could make. All lawyers seemed the same to her, and she accepted the advice, because it cost her nothing.

All this was five years ago. Diminutive had pinched pennies and got her girl through two years of college. Suddenly even the \$100 a month stopped; the business was bankrupt.

Daughter left the university. She had no business training of any kind, and since she had no degree, nor teaching training, her high school and university years were of no value, except that they gave her a larger general knowledge.

The world of commerce demands specific training. Daughter had none and took her place with the unskilled. She was glad to get a job as messenger in a department store. Her meagre salary pays for food, clothing, car fare and household expenses.

Diminutive tried selling hosiery from door to door, but she was not good at it. She was not a saleswoman. Her average was \$1 a week. She tried many other kinds of work where "no experience is necessary," but the game wasn't worth the candle. Now she is apprenticed, with no compensation, to a milliner, who thinks she may make a saleswoman after a little training.

There is a moral to this tale. Widows and fathers, who do not

Of Interest to Women.

Diet and Health

By Lulu Hunt Peters, M.D.

THE QUESTIONNAIRE AGAIN!

My Dear Followers:
I am running the questionnaire again because I am quite sure there are many of you who have been away on vacation and have not seen it. I want all of you who have reduced, even though you may have written me, to fill out this form and send it to me, if you please (unless you have filled out a previous one.)

I am trying to get some statistics on this whole reduction question both in the interest of science and in order to be able to help you the more. We will not use your name in any way. I want it simply as evidence of good faith.

The answers to the first questionnaire have been exceedingly encouraging and interesting. It will take me some time to tabulate them and then I will give you the results.

REDUCTION RECORD
Name..... Date.....
Address (St.)..... City..... State.....
Sex..... Age..... Height (without shoes)..... Normal wt.....
Weight at beginning of reduction..... At present time.....
Total loss.....
Average no. calories per day while reducing..... Before.....
Did you begin by three-day liquid diet?.....
How much weight lost during?.....
How long overweight?..... Were you symmetrically fat?.....
If not, where fattest?.....
Does fat "run" in your family?.....
Have you had a child since reducing?.....
Were you sterile before?..... Do you trace the beginning of your overweight to pregnancy, nursing, recovery from illness, operation or other special conditions?.....
If down to normal weight, are you holding it on an average diet without gaining?.....
Do you go on one liquid day a week now?.....
How much exercise before?..... During?..... Type of exercise?.....
Average hours sleep..... Sleep well while reducing?.....
Improvement in mental efficiency..... Looks..... Happiness.....
Any special discomforts while reducing?.....
What disorders relieved or lost by reducing?.....
Did you use any other measures besides diet and exercise?.....
Mark the food you were especially fond of: Bread and Butter.....
Pastries..... Candy..... Fruit..... Creams..... Gravies.....
Potatoes..... Meats..... Vegetables..... Nuts.....
Have you lost your excess desire for them?.....
While reducing, what did you usually eat for:
Breakfast..... Total C's.....
Luncheon..... Total C's.....
Dinner..... Total C's.....
Between meals?.....
How much water did you drink with your meals? (It is not fattening.).....
How much between meals?.....
Remarks:.....
The rule for finding the normal adult net weight:
For five feet in height, in stocking feet, allow 110 pounds; add five and one-half pounds for each inch over, and subtract five and one-half pounds for each inch under five feet.
Depending upon the heaviness of your bones, you may vary 5 per cent above or below this, and still be normal. (Net weight means without clothes.)

PUSH CITY BUILDING WORK

Construction Nears Close on Patriotic Memorial, County Museum and Hall of Justice

Construction work on three of the large public buildings, designed by the Allied Architects Association, is rapidly nearing completion, and the preparation of plans for several other public structures is making satisfactory progress, according to the monthly report made by George J. Adams, manager of the association's production department. During August, according to the report of the building with the exterior of the new addition to the Los Angeles County Museum of Science, History and Art was completed, and the finished work and marble work are being set in place. The new Hall of Justice, the exterior, lobbies and courtrooms of which were designed by the association, is rapidly nearing completion. The exterior facing of granite and terra cotta is being set for the top stories, and the finish work for the main-floor corridors and elevator lobbies has been started. Decorations are also at work in the various courtrooms. At the Patriotic Hall, the new memorial which is being built by the county to veterans of all wars on South Figueroa street, the installation of the cast-stone front

Importer Paints Drab Picture of Europe's Plight

Depressing stories about European industrial conditions are told by James Oviatt, president of Alexander & Oviatt, Importers, who has just returned to Los Angeles from a buying trip to the industrial centers of England, France, Germany, Austria, Czechoslovakia, Hungary and Italy. Labor conditions are worse instead of better in England, Mr. Oviatt declared. "The English laboring man seems to think that it is better to loaf and get \$2 a week from the government than it is to work and make twice that. In Vienna, Berlin and Budapest, the manufacturer is unable to borrow money for business enterprises at any except ruinous interest. Fluctuating money is keeping foreigners out of Germany, Austria, Czechoslovakia and Hungary, although many tourists are seen in England, France and Italy."

CREDIT MEN TO MEET THEIR NEW PRESIDENT

When the Los Angeles Credit Men's Association holds its September meeting in the ballroom of the Alexandria Hotel at 8:30 p. m. Thursday, its members will meet their first opportunity to meet the organization's new president, Edgar L. Ide, in the capacity of presiding officer. Mr. Ide, who is a member of the Kellaway-Ide Company, commercial printers, served the Los Angeles Credit Men's Association for eight consecutive years as secretary, and at its recent annual meeting was chosen president. He enjoyed the distinction of having been present at every one of its monthly meetings while he occupied that chair. Saturday Mr. Ide and J. A. Cullen, who is now secretary of the association, returned from San Francisco where they attended a session of the western division of the National Association of Credit Men, with which the local association is affiliated.

OTHER FAIRS PREPARED FOR

With Closing of State Exposition, Chamber Takes Steps for Displays at Other Exhibits

With the closing yesterday of the California State Fair at Sacramento the Chamber of Commerce of Los Angeles at once took steps for establishing extensive exhibits at future expositions of like character to be held at Ventura, Pomona and Riverside. The exhibits denote agricultural, horticultural, mineral, shipping and other advantages of this section of the State. Similar exhibits now are being shown at a string of State fairs in the Middle West. A. H. Koch, in charge of the Chamber of Commerce, declared that at the Ventura County Fair, from the 15th to 20th inst., he will have on display for the chamber an array of California fruits and crops, arranged in seasonal order. The booth, he said, would be constructed on the scheme of a pergola, in pastel colors and decorated with ferns. KOCH TO HAVE CHARGE When the Los Angeles County Fair opens at Pomona the 23rd inst., for a four-day run, Koch again will be found in charge of the Los Angeles county booth. The chamber announced. The exhibit then will depict what is called "The farmer's dream," showing a farmer on the porch of an eastern home, visualizing an ample harvest in far-away California. At the Southern California Fair, Riverside, the 30th inst. to October 6, next, the chamber expects to

Cuticura Loveliness A Priceless Heritage

For generations mothers have been using Cuticura Preparations for all toilet purposes and have been teaching their daughters that daily use of them produces clear, smooth skin and healthy hair. They find the Soap pure and cleansing, the Ointment soothing and healing, and should any irritation arise, the Talcum an ideal toilet powder.

Rappaport to Appeal Case if Retrial Denied

Having been convicted on three counts of embezzlement of funds of the Rosecrans Farm, Inc., Max Rappaport, former attorney for the company, will appear before Judge Revere today for judgment and sentence. It was stated by Rappaport's attorney that he will file a motion for a new trial and, if that is denied, will appeal the case. Rappaport, it was charged, suggested to Meyer Gradowitz, manager of the firm, that they buy produce on credit, sell the same and then keep the money. Gradowitz, also accused, was tried, but the jury failed to agree, and he will be given another trial. According to testimony adduced by Dep. Dist. Atty. Orme, the company books showed a shortage of \$15,000.

Corona Bank's Name Misused in Fraud Case

R. G. Van Vleet, charged with misapplication of bank funds, formerly was cashier of the Corona National Bank instead of the First National Bank of Corona. F. E. Snider, cashier of the latter bank, informed The Times yesterday. The First National Bank, Mr. Snider stated, has never had any trouble of that nature and was strong enough to take over the assets and liabilities of the Corona National Bank and pay the depositors in full, assuming a loss of approximately \$25,000.

ENGINEERS MEET THURSDAY

Los Angeles Chapter American Association of Engineers, will hold their regular monthly dinner meeting next Thursday evening at the Spofford Arms on Wilshire Boulevard. Mr. E. P. Barclay, a mining engineer, will deliver the address of the evening, his subject being "Diamond Mining in South Africa."

Col. Sobieski Tendered Party for Birthday

In honor of his eighty-third birthday, twenty-five friends of Col. John Sobieski, prominent lecturer, and humanitarian, tendered him a party Thursday evening at the home of his daughter, Mrs. Mary Gillhouse, 2867 Brighton avenue.

The affair was arranged by Mrs. Alice Simmons Wheeler, prominent in women's club activities in the city, and many of the friends, who paid their respects to Mr. Sobieski had known him for as long as fifty years. During the evening short talks were given by several of the guests, including M. L. Stewart, Rev. Wiley J. Phillips, Mrs. Thomas McCleary, and others and refreshments were served by Mrs. Gillhouse. Col. Sobieski responded with a brief resume of his life in which he recalled that at an early age he was driven into Austria from Poland where his grandfather was the last of occupy the throne. When still a boy he was forced to leave Austria and made London his home until at the age of 13

BANDIT SUSPECT TO BE ARRAIGNED TODAY

Arrested several weeks ago at Tucson, Ariz., after a search of several months, James F. Cline, accused of robbery of the operator of a Standard Oil Company service station at Whittier, will appear in Judge Revere's court for arraignment. Cline and James A. Smith are accused of having held up and robbed F. H. Stewart, station operator, of \$3.37. They are said to have been seen at that time by Ray Bolton, another employee of the same company, and Miss Margaret Raynor, who happened to be driving by. A pursuit followed, but the two bandits escaped. Later Cline was arrested in Tucson, and on Saturday Smith, who was employed by the Union Oil Company, was arrested. Both men are in the County Jail. Smith will appear for arraignment in Justice Court this week.

**YOUNG COMPOSER'S
FAREWELL RECITAL**

Contralto Fennner Displays Big
Talent for Poetry
and Music

BY ISABEL MORSE JONES
Contralto Fennner, Los Angeles

The future of
spirit of youth
behind the
young woman
the art of poetry
Fennner goes to
the musical Los Angeles
well.

**HELEN FENN
APPEAR IN**

the genius of composition, appeared at the Los Angeles Opera House at the Pops Club on Saturday evening in company with several well-known vocalists. He sang a remarkable program of her own works. It was the occasion of her farewell concert before her departure for a winter in New York as president of the Guggenheim and the Juilliard Foundation School. An effluence of the musical elect, and many warm admirers greeted the young artist as she came on. There were songs with words of her own weaving, and songs without words, but all with accompaniments at the piano.
